

FACT SHEET

MORE INSIDE™ ::

The Lubrizol Corporation is the world leader in chlorinated polyvinyl chloride (CPVC) resins and compounds, which are trusted in various applications, including plumbing, fire sprinkler systems and industrial piping – but the benefits reach far beyond building and construction. Manufacturers rely on Lubrizol’s CPVC materials as cost-effective solutions for their high-performance application needs.

THE LUBRIZOL ADVANTAGE

History

With Lubrizol’s CPVC expertise since 1959, billions of feet of pipe have been successfully installed in numerous residential, commercial and industrial applications across the globe. With experience like this, you know you are getting reliable, long-lasting, high-quality CPVC solutions from a global leader.

Service

From training and product development to code compliance, Lubrizol’s network of customer support specialists and technical service representatives are experts in their fields, providing unparalleled assistance to building and construction customers around the globe.

Research & Development

Lubrizol’s Research & Development team, in conjunction with its piping system consultants, work closely with construction partners to create solutions that continuously improve the performance and ease-of-use of our products.

Product Lines

Lubrizol’s unparalleled level of experience, proven performance, track record for innovation, product diversity and commitment to customer support make us the No. 1 choice for a variety of CPVC needs:
