

THE LUBRIZOL FOUNDATION

2016 ANNUAL REPORT

Lubrizol

■ MISSION STATEMENT

The mission of The Lubrizol Foundation is to complement and support the interests, values and vision of The Lubrizol Corporation by awarding financial support to educational institutions and charitable organizations in communities primarily within the United States where Lubrizol operates major facilities.

SUMMARY OF GRANTS

	2016	2015
Education	\$ 756,500	\$2,139,090
Health & human services	979,694	762,416
Civic & cultural	264,000	591,500
Youth activities	113,600	70,000
Environmental	97,500	82,500
Community connection	32,500	43,000
Matching gift program	835,823	851,057
Total grants	\$3,079,617	\$4,539,563

The Foundation continues to support educational initiatives, focused on our core funding priority of STEM, Science, Technology, Engineering and Mathematics education for underserved youth. We are proud of our Founders commitment to education.

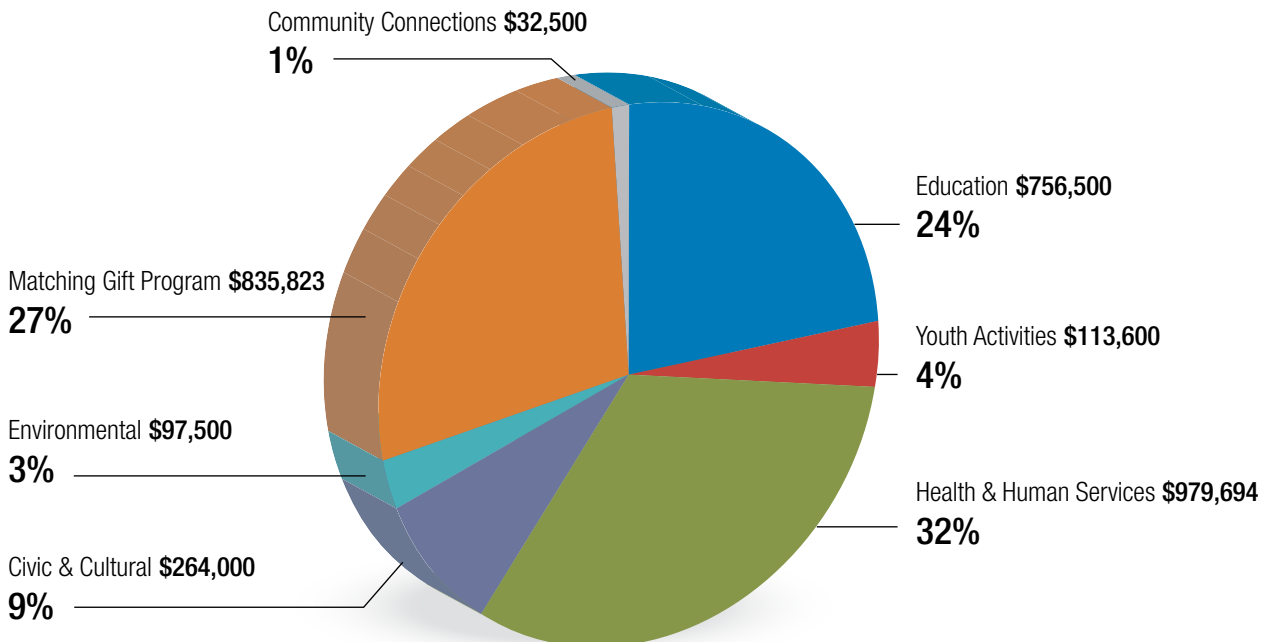

“Education is crucial for our country, for success in business and for the dignity and growth of an individual.”

A. Kelvin Smith – one of the Lubrizol founders

2016 GIVING BY CATEGORY

\$3,079,617

Education scholarships, fellowships and awards

26 Grants – \$526,000

Throughout its history, The Foundation's priority has been support for higher education. Under the terms of the scholarship program, The Foundation selects the colleges and universities and designates the fields of study. Principal emphasis is given to the study of chemistry, chemical engineering and mechanical engineering. All grants are based on established student achievement and/or academic potential or the financial need of exceptional students. The students are selected by the colleges and universities.

Education general

28 Grants – \$230,500

The Foundation also has a commitment to support education through grants for capital and operating purposes, not only to colleges and universities, but also, to a lesser extent, to elementary and secondary schools. Grants are also made to educational programs and combined educational funds for operating expenses.

Health & human services

60 Grants – \$979,694

In addition to significant annual contributions to United Way campaigns in Ohio and Texas, The Foundation provides direct capital and operating support for health and human service organizations. Grants are also made to nonprofit hospitals, specialized health care providers and to organizations providing basic human services, e.g., clothing, rehabilitation and hospice care to those in need.

Civic & cultural

34 Grants – \$264,000

The performing arts, museums, public broadcasting stations and special interest groups enhance the communities in which we live and work. These organizations must generally look to the private sector for their principal support. The Foundation is pleased to provide both capital and operating grants to many of these organizations.

Youth activities

24 Grants – \$113,600

The Foundation considers its youth activity grants to be an excellent investment in the future. The Foundation provides operating and capital grants to organizations that provide training in leadership skills and responsible citizenship.

Environmental

12 Grants – \$97,500

Since 1954, The Foundation has provided support for environmental activities through grantmaking in civic and cultural areas. In 2001, the Board of Trustees, consistent with the corporate vision, made it a separate program area. This category supports parks, nature centers, conservancies and local environmental education efforts.

Community connection

Matching donor hours to 54 charitable agencies – \$32,500

Full-time and part-time U.S. employees of The Lubrizol Corporation or its U.S. subsidiaries, who complete 40 hours or more of volunteer work in a calendar year for an eligible not-for-profit organization, can complete an application for a \$500 grant from The Lubrizol Foundation to the charitable organization. An employee may submit one grant application per year to The Foundation.

Matching gift program

Matching Gifts – 1,444 donations matched – \$835,823

The Matching Gift Program was established to provide an incentive to employees and retirees to give financial support to educational institutions and charitable organizations and to encourage and support volunteer work in the communities in which they work and live.

■ PRESIDENT'S MESSAGE

During 2016, The Lubrizol Foundation awarded more than \$3 million to qualified institutions and nonprofit organizations serving the areas of education, health and human services, community and culture, environment and youth.

The primary focus of The Foundation continues to be the support of education, especially higher education. Grants to education amounted to \$756,500, which included \$526,000 for scholarships, fellowships and awards at 26 designated colleges and universities throughout the United States. Recognizing the significant financial obstacle faced by many students who pursue collegiate study, in 2016 The Foundation increased direct scholarship funding \$115,000 – approximately 30% – by designating additional scholarships at both Cleveland State and Kent State Universities.

In our 2016 United Way Campaign, employee generosity drove total giving to \$513,842 in support of 18 United Way locations near our U.S. based facilities, in part due to The Foundation's commitment to match employee pledges. The Foundation has been a steadfast supporter of the United Way since 1958.

The Foundation's Matching Gift program awarded \$835,823 to qualifying organizations based on more than 1,400 employee and retiree donations and requests. Lubrizol employees also volunteered thousands of hours of their time to nonprofits during the year and their efforts were acknowledged with Community Connection grants awarded to those nonprofits by The Foundation.

In organizational changes during the year, James L. Hambrick resigned as Chairman and Trustee upon his retirement as Chairman, President and Chief Executive Officer of The Lubrizol Corporation. For more than 14 years with the Foundation, James provided invaluable insights, boundless energy, and strong sense of philanthropy. We are pleased that Eric R. Schnur joined The Foundation as the corporation's new Chairman, President and CEO.

On behalf of all Trustees, we are grateful for the opportunity to continue our tradition of philanthropy by positively impacting the U.S. communities in which The Lubrizol Corporation has a major presence. We are privileged to list the recipients of The Foundation's grants on the following pages of this report together with highlighted profiles of some of these organizations.

J. Mark Sutherland, President

The Lubrizol Foundation, April 26, 2017

University Hospitals, Cleveland, Ohio

University Hospitals (UH) is one of the United States' largest nonprofit, academic medical systems. *U.S. News & World Report* lists UH as a nationally ranked hospital, – and with 150 locations throughout Northeast Ohio, the UH network encompasses world-class hospitals, outpatient facilities and research centers.

Countless current and former Lubrizol employees and their families benefit from UH health care and support. For more than 50 years, The Lubrizol Foundation has been a supporter of UH facility improvements and medical service advances. Today, The Foundation is a proud member of UH's Samuel Mather Society, a recognition that acknowledges UH donors whose lifetime gifts total \$1 million or more.

In 2016 The Lubrizol Foundation made a considerable grant to support UH's newest endeavor, the UH Rainbow Center for Women & Children, currently under construction in the Midtown neighborhood. The 40,000-square-foot outpatient facility will address the total health needs of Cleveland families and surrounding communities, and will collaborate with social service agencies to provide additional support to patients and families.

The three-story facility will be dedicated to women's health programs, pediatric primary care and social services. Much needed support services will be conveniently located on-site, including prenatal care, nutrition education, dental screening, mental and behavioral health services, childbirth education and parenting support and Women, Infants, and Children (WIC) offices.

The UH Rainbow Center will focus on the medical, social and environmental factors that impact overall health in a user-friendly environment that is centrally located. It is being built on the RTA's Healthline, a bus-rapid transit system, making it convenient for neighborhood residents to access care, and extended hours will be available for evening appointments. More than 45,000 patient visits are expected in its opening year, with increases of 5% or more anticipated annually.

The UH Rainbow Center and its campus will become a true community asset, not only for medical care but for community gatherings and recreation. The facility will feature rooms for meetings and group care, and a walking path and garden. Future plans include opportunities for adjacent office buildings and retail facilities. Long-term results include healthier families, a more connected community and a revitalized Midtown neighborhood.

The Lubrizol Foundation remains committed to supporting the health and well-being of Lubrizol employees and their families, and enhancing the care offered to all Clevelanders. We are pleased to support UH in its 150-year mission – *To Heal. To Teach. To Discover.*

Kent State University – Making STEM Education a Top Priority

Lubrizol has valued a strong connection with Kent State University for decades. Since 1958, both The Lubrizol Corporation and The Lubrizol Foundation have generously contributed to Kent State University in the form of scholarships in chemistry, engineering and math, laboratory equipment, building construction and renovations and employee matching gifts that support a wide variety of university programs. The Foundation's most recent grant was made in support of the Integrated Sciences Building.

Recognizing the vital importance of science, technology, engineering and mathematics (STEM) education in Northeast Ohio and across the nation, Kent State University has made renovations, enhancement and new construction for STEM programs a top priority.

To keep pace with current technology and trends, Kent State's initiatives provide STEM students with the latest high-tech, flexible learning facilities necessary to elevate Kent State graduates' to a nationally prominent level of excellence. Extensive renovations and upgrades have been occurring for each of the STEM buildings on campus, including Williams, Cunningham and Smith Halls. A new 70,000-square-foot Integrated Sciences Building (ISB) that will wrap around Williams Hall is also being constructed and will open in fall 2017.

Located in front of the University Library and adjacent to the Student Green, the highly visible Integrated Sciences Building provides students and faculty with a cutting-edge facility that includes new instructional spaces, research labs and offices, study areas and common areas for student, faculty and community interaction and events.

The ISB's key theme of "science on display" integrates the study of science into the very experience of walking through the building. With interactive science displays and transparent classroom walls, the facility brings the study of science to life, engaging the minds and igniting the imagination of its patrons while also embodying best practices for a green building. Given its prominent location on campus, the ISB will have a broad impact as it showcases and promotes science to diverse student populations as they pass through the building.

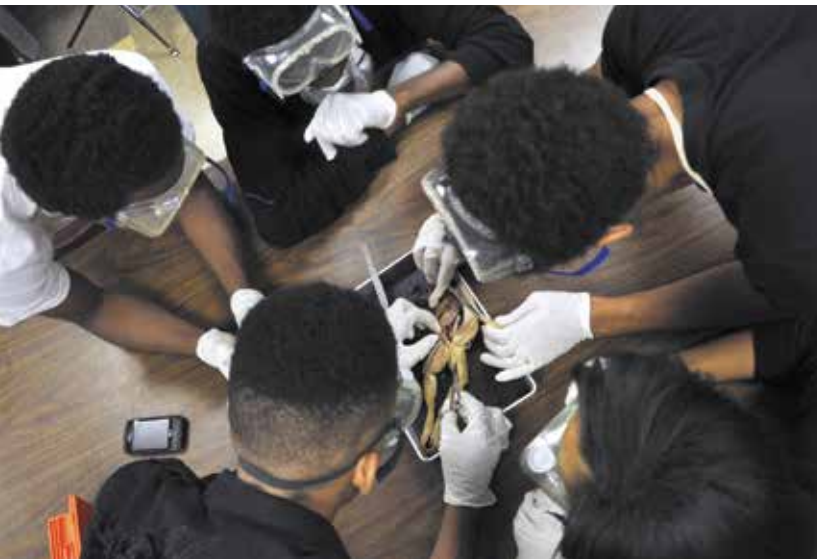

Students will benefit from a 21st-century learning experience in three new instructional spaces within the building, including two teaching laboratories and an active learning classroom. The teaching laboratories, used for Biological Diversity and Biological Foundations courses, will serve a diverse range of students. Because these courses can substitute for Kent Core basic science classes, students from virtually the entire undergraduate student population can have the opportunity to leverage these modern, flexible laboratories to learn about the fundamentals of science.

While the first floor of the ISB will feature modern teaching labs to increase student engagement and learning outcomes, the second floor will provide state-of-the-art research labs for leading research faculty. Locating research office space and interdisciplinary labs on the second floor is an intentional effort to bolster the integration of research and high-quality education in the undergraduate student experience. These labs will also allow multiple faculty members to work collaboratively across traditional disciplinary boundaries in the sciences. The co-location of leading researchers in highly visible labs with undergraduate students in the same building will help ignite the passion for STEM education at the earliest stages of a Kent State student's journey.

Whitney M. Young Leadership Academy, Cleveland, Ohio

Whitney M. Young Leadership Academy, a public school within the Cleveland Metropolitan School District (CMSD). The mission of Whitney M. Young School is to provide an excellent education to gifted and talented students of diverse backgrounds. Named after Whitney M. Young Jr., a prominent civil rights leader, the school is located in Cleveland's Lee-Harvard neighborhood.

The school has scored among the top high schools in the state of Ohio. Whitney Young has been featured on Channel 3 News in Cleveland for being just one of four CMSD schools to have a 100% graduation rate. The school has been ranked among the top high schools in the United States by U.S. News and World Report. Whitney Young became the first and only CMSD school to receive the state's highest rating of Excellent with Distinction. Whitney Young is currently listed on Ohio's Schools of Promise List. Whitney Young has been listed as an Ohio School of Promise more than any other school in the state and has been a National Blue Ribbon School.

The school promotes an accelerated program, leadership, self-motivation, creativity, independent thought, and intellectual curiosity. Since their students often learn differently than other students, part of the purpose shall be to adapt their curriculum and teaching strategies to accommodate special needs and learning styles. They believe parents and community are a vital part of this educational process.

American Red Cross Texas Gulf Coast Region

The American Red Cross exists to provide compassionate care to those in need. Its network of generous donors, volunteers and employees shares a mission of preventing and relieving suffering, here at home and around the world, through five key service areas: disaster relief and preparedness, assistance for Military personnel and their families, health and safety courses and transportation. In fact, the Red Cross has a Congressional mandate to provide disaster and military assistance, though it is an unfunded mandate.

In 2016, The American Red Cross continued to respond to the horrific storms, floods, and tornadoes that ravaged parts of the Texas Gulf Coast as well as storms that hit north and east Texas, Oklahoma, Arkansas, and Louisiana.

One of the hardest hit counties was Anderson County (Palestine, Texas) where more than 7 inches of rain fell quickly taking the lives of at least 5 individuals.

The American Red Cross staff and volunteers provided shelter, meals, counseling, assistance with cleanup, disaster assessments and financial assistance casework. In Harris County (Houston) alone, more than 9,000 homes had been damaged from floodwaters and more than 4,300 of those have been designated uninhabitable or as to have received major damage. Statewide there were over 11,000 homes damaged from the storms.

Here are some additional statistics:

- Feeding was a major focus. They served more than 5,000 meals and more than 8,000 snacks on one day alone, and have served over 90,000 meals and snacks to date.
- Bulk item distribution was a major focus. They distributed more than 193,000 bulk items, more than 6,500 clean up kits, and more than 2,100 comfort kits which contained basic hygiene items.
- Approximately 2,000 staff and 1,500 volunteers worked to help repair and mitigate the flood damage.
- They conducted outreach in Harris, Montgomery, Anderson, and San Jacinto counties.

The prevention of tragedy is also a critical priority to the Red Cross. For example, the Red Cross responds to disasters across the nation nearly every eight minutes and approximately 93 percent of those are home fires. For that reason, the national Home Fire Campaign was launched a couple years ago with the goal of reducing fires by 25% by 2019. Throughout Houston and the Texas Gulf Coast, Red Cross volunteers – including students, fire fighters, teachers, retirees and more – can be seen canvassing neighborhoods to determine who needs in-home smoke alarms. An estimated 5,000 smoke alarms have been installed across the Texas Gulf Coast in just the past couple years.

Just as we help make our customers' products better, Lubrizol has a responsibility to our people, communities and others to help create a better, more sustainable world. Our relationship with the American Red Cross is an example of how we make our responsibility a reality in the communities where we work and live.

Youth Opportunities Unlimited, Cleveland, Ohio

Youth Opportunities Unlimited (Y.O.U.) was founded in 1982 as a nonprofit to provide Cleveland teens with their first paid summer job. The organization has evolved and expanded, and today Y.O.U. provides workforce preparation services and entrepreneurship training to youth ages 14-24 in Northeast Ohio who live in economically distressed communities. Y.O.U. works in partnership with school districts, employers, nonprofits and others. Their mission – to help teens and young adults succeed by providing educational and workforce opportunities, skills development, and access to career pathways – is aligned with the greater Northeast Ohio business community as well as with values supported by The Lubrizol Corporation. They envision the greater community working together to ensure every young person is ready to pursue a path to economic self-sufficiency. Y.O.U. knows we can accomplish more when we form mutually beneficial partnerships across sectors

Education research has identified 20 barriers to success, mostly non-academic, and have determined the presence of just two barriers is sufficient to result in youth dropping out of high school and failing to achieve his or her potential. Teens served by Y.O.U. have on average five to six barriers to overcome if they are to move toward successful adulthood.

The essential factor for achieving success is goal-focused one-on-one mentoring from Y.O.U. Career Coaches and volunteer support from the business community. Career Coaches provide a variety of activities designed to foster academic, personal and career success and help teens overcome obstacles.

Y.O.U. programs deliver on the organization's promise to increase high school graduation rates; find youth internships, summer jobs and permanent employment; explore college and other post-secondary education options; teach entrepreneurship education and provide youth with social-emotional learning and workplace skills.

Entrepreneurship Education:

- **E-CITY:** Nationally recognized entrepreneurship curriculum created by the Network for Teaching Entrepreneurship. The 70-hour curriculum is offered as a for-credit class and is expected to serve 150 teens at targeted urban high schools. E-CITY emphasizes creativity, business planning and financial capability.

Community-Based Workforce:

- **Summer and Year-Round Youth Employment:** In partnership with the City of Cleveland Public Utilities Department, the MyCom Initiative, and Cuyahoga County Jobs and Family Services, Y.O.U. provides subsidized and private sector-funded jobs for teens and young adults focusing on financial capability and reviewing basic job readiness skills.
- **ProPath Internship Program:** Places teens with mentors in 120-hour work experiences that align with career pathways and allow them to apply the knowledge and skills learned in the classroom to a professional work environment. This internship program is guided by the Irvine Foundation's Gold Standards for Effective Internships and is presently serving youth at more than 30 high schools throughout Cuyahoga County.
- **Day One certification training:** In collaboration with multiple agencies, Y.O.U. offers young adults ages 18-24 industry-specific training in customer service/retail, facilities maintenance, allied health, environmental sciences and information technologies. Training is offered in partnership with the Ohio Means Jobs Young Adult Resource Center, a workforce one-stop geared to teens and young adults.

The Lubrizol Wickliffe, Brecksville and Painesville facilities are extremely committed to Youth Opportunities Unlimited. Each year employees volunteer as mentors and participate in E-CITY.

Cuyahoga Valley Scenic Railroad, Peninsula, Ohio

Cuyahoga Valley Scenic Railroad's mission is to provide educational, recreational, and heritage railroad experiences and provide alternative transportation to and within the Cuyahoga Valley National Park and the Ohio & Erie Canalway. Organized in 1972, the Cuyahoga Valley Scenic Railroad (CVSR) has carried passengers through Cuyahoga Valley National Park and is one of the longest and most scenic railroads in the country. The route extends from Akron in the south to Rockside Road in the north. Along the way, stops can be made at the canal visitor's center, Peninsula, Hale Farm and tourist attractions in Akron.

CVSR is committed to providing a safe, comfortable and reliable experience for its passengers. CVSR ridership has grown over the past decade, with a 70% increase in ridership from 2007 to 2016. CVSR served a record 214,063 passengers in 2016. The Cuyahoga Valley National Park Comprehensive Rail Study, conducted by the John A. Volpe National Transportation Systems Center in 2013, estimates that CVSR will add at least 6,500 new riders per year over the next twenty years.

Ticket sales indicate that a growing percentage of ridership is participating in destination experiences such as food programs, tasting events, educational programs, and interpretive performances offered in partnership with Cuyahoga Valley National Park.

CVSR provides education programs on the train in conjunction with the National Park Service. Thanks to grant funding, in 2016 CVSR was able to fully subsidize tickets and busing fees for more than 2,100 students from low-income school districts in Cuyahoga and Summit counties. The program received positive feedback from teachers, who would recommend the program to others.

Volunteers are vital to the overall operation of CVSR. In 2016, 1,740 CVSR volunteers contributed a record 93,221 hours of service – the equivalent of approximately 45 full-time employees! One dedicated volunteer is a Lubrizol employee serving on their board.

Since 1991, both The Lubrizol Corporation and The Lubrizol Foundation have been a sincere supporter in this Scenic Railway.

Lake Erie Nature & Science Center, Bay Village, Ohio

Lake Erie Nature & Science Center is the only nature center in Northeast Ohio providing a comprehensive array of educational programs, wildlife education and rehabilitation and space science programs, they are also the only nature center in Northeast Ohio with direct access to Lake Erie. Their 22,500 square foot facility is within the Cleveland Metroparks on 2.5 acres, and includes an outdoor classroom, live animals and a planetarium. They serve more than 168,000 children and adults each year, and visitors appreciate that the Center is open seven days a week with free admission.

The Center is a proud affiliate of Cleveland Metroparks and is independently funded through philanthropic contributions, foundation and corporate grants and earned income. As a partner to schools in Cuyahoga and Lorain Counties, they align preschool and field trip program offerings with Ohio Content Standards.

The Walter R. Schuele Planetarium – Space Science Education center is home to one of only two public access planetariums in the Cleveland area Northeast Ohio, where nearly 22,000 children and adults are introduced to the fascinating realm of astronomy and space science each year. The planetarium outreach program has brought the universe to 10,000 school children throughout Cuyahoga and Lorain Counties.

The Kenneth A. Scott Wildlife Education and Rehabilitation program handles more than 4,000 calls every year. The Center is the only organization in Northeast Ohio that provides free wildlife advice and education and at the same time accepts more than 1,400 injured and ill wild animals into the facility annually. The youth service learning program prepares local teenagers for science careers and develops leadership skills.

The Foundation supported the Walter R. Schuele Planetarium, part of Phase 2 of the Center's capital campaign. In 2016, the Foundation awarded a grant in support of geothermal system improvements. The planned improvements to the Center's geothermal heating and cooling system are part of the third and final phase of capital renovations which began in 2011.

Two Lubrizol employees are proud to serve on the Board of Directors of the Center.

Education scholarships, fellowships and awards:

The University of Akron	\$ 51,000
University of Cincinnati	20,000
Cleveland State University	105,000
Cuyahoga Community College	7,000
University of Dayton	12,000
Gaston College	6,600
Hiram College	13,000
University of Houston	12,000
University of Houston - Clear Lake	10,000
Jefferson Community & Technical College	6,600
John Carroll University	12,000
Kent State University	100,000
Lake Erie College	6,000
Lakeland Community College	10,200
Lamar University	10,000
Lee College	2,000
Lorain County Community College	6,600
Louisiana State University	4,000
The Ohio State University	64,000
University of Oklahoma	4,000
Paducah Junior College	8,000
University of Pittsburgh	8,000
San Jacinto College Central	16,000
Texas A&M University - College Station	12,000
The University of Texas at Austin	12,000
University of Toledo	8,000
Total	<u>\$526,000</u>

Education capital grants:

Cleveland Metropolitan School District	\$ 26,000
<i>For the purchase of 30 laptops and a computer cart at Whitney M. Young Leadership Academy in support of Honors/AP Chemistry & Physics</i>	
Kent State University	25,000
<i>Toward the construction of the new Integrated Science Building</i>	
Notre Dame Cathedral Latin School	15,000
<i>Capital grant to support the purchase and improvements in scientific equipment and technology for the use by students and science teachers</i>	
Total	<u>\$ 66,000</u>

Educational programs and combined funds operating grants:

Boys Hope Girls Hope Northeastern Ohio	\$ 15,000
College Now Greater Cleveland	10,000
<i>To support College Now's Mentoring Program</i>	
Communities in Schools, Inc.	3,500
Free Enterprise Institute	3,000
Invent Now	4,000
<i>In support of Camp Invention</i>	
Junior Achievement	
<i>Greater Cleveland</i>	2,500
<i>Southeast Texas</i>	3,000
Lake/Geauga Educational Assistance Foundation	2,500
Learning About Business	4,000
The Literacy Cooperative	1,500

■ POLICIES AND OBJECTIVES

A private foundation established in 1952, The Lubrizol Foundation is a nonprofit Ohio corporation and exempt from Federal income tax under section 501(c)(3) of the Internal Revenue Code. The Foundation's activities are directed by a Board of Trustees which determines its policies and objectives, elects its officers and appoints the members of its committees. The Foundation has four committees: Executive, Gift, Investment and Scholarship.

The Lubrizol Foundation makes grants in support of education, health care, human services, civic, cultural, youth and environmental activities of a tax-exempt, charitable nature.

Except for its scholarship program at 26 colleges and universities, The Foundation makes grants primarily to charitable organizations in communities where The Lubrizol Corporation has major U.S. operations. Priority is given to the greater Cleveland, Ohio and Houston, Texas areas. In addition to these activities, The Foundation administers The Lubrizol Matching Gift Program.

■ APPLICATION PROCESS

Written applications of established nonprofit charitable organizations will be considered on a case by case basis. There are no application deadlines. Grants are not made for religious or political purposes, to individuals nor, generally, to endowments.

Grant proposals should include the following:

- a cover letter that summarizes the purpose of the request, signed by the executive officer of the organization or development office.
- a narrative of specific information related to the subject of the request.
- current audited financial statements and a specific project budget, if applicable.
- documentation of the organization's 501(c)(3) nonprofit tax exempt status

Additional descriptive literature (e.g., an annual report, brochures, etc.) that accurately characterizes the overall activities of the organization is appreciated. Upon review, further information may be requested including an interview and site visit.

Applicants will receive written notification of the decision on their proposal. An organization whose request has been declined will not be reconsidered for 12 months. Applicants are welcome to contact The Foundation office for further clarification of the foregoing requirements.

Grant applications should be mailed to:

The Lubrizol Foundation
29400 Lakeland Boulevard
Wickliffe, Ohio 44092
