

OVERVIEW

Created through the combination of Estane® TPU and the unique foaming process, BounCell-X™ has become an essential to the sports and recreation industry. Delivering highly-elastic, microcellular parts for superior cushioning and long-term durability this product delivers the comfort you need to exceed market demands.

BENEFITS

BounCell-X technology provides superior compression properties, improved production efficiency, traditional and aesthetic appeal, as well as abrasion and cut resistance. The Estane TPU product line for BounCell-X does not contain extra chemical additives, making it the perfect fit for brands with post-consumer recycling programs.
