

Lubrizon Additives partners with customers and OEMs to solve consumers' toughest challenges through additives for engine oils, driveline applications, gasoline and diesel fuel, other transportation-related fluids and industrial lubricants.

To our business relationships, we bring trusted expertise, testing confidence, supply assurance and independent strength.

Long a leader in the industry, our products play a key role in delivering reliability, efficiency or wellness to our customers' end users, supporting Lubrizon's mission of improving lives. Our enabling technologies, combined with today's advanced hardware, help to reduce harmful particulate matter (PM), carbon monoxide (CO), and nitrous oxide (NOx) emissions, and through measurable benefits in fuel economy, directly contribute to reductions in carbon dioxide (CO₂) emissions.

We have a strong track record of reliability and collaboration with our customers, OEMs and end users. As we look to the future, we will continue to expand our engagement with OEMs to encourage greater and faster innovation and adoption of lubricants. We are investing in our modeling and testing capabilities to ensure that we continue to deliver high-performance lubricants and fuel additives to meet the ever-increasing demands of advanced OEM hardware designs. We are also improving our competitiveness by introducing next-generation products and components, while focusing on value-added and differentiated offerings.

Segment President: Tom Curtis

Headquarters: Wickliffe, Ohio, USA

Our Business

Driveline - Lubrizol's broad additive product line covers a wide range of driveline applications, including passenger cars, commercial vehicles, and off-highway vehicles used in construction, mining, agriculture and forestry. We provide complete breadth and depth of knowledge, superior technical facilities, regional testing capabilities and talented people, all of which allow us to continue to address evolving end-user demands through innovative performance packages for gear oils, transmission fluids and off-highway fluids.

Engine Oils - Lubrizol engine oil additives are designed to provide protection for end users driving both modern, high-tech engines and older models, enhancing vehicle performance while minimizing environmental impact. Our diverse product portfolio, which includes engine oil additives and performance polymers, ensures we are able to deliver the right oil for the right application, addressing consumer demands across a broad spectrum of routine and harsh environmental conditions.

Viscosity Modifiers - Lubrizol's viscosity modifiers are more than just thickeners - they are performance polymers that provide significant improvements for lubricants in a wide variety of applications, including

engine oils, driveline fluids, industrial lubricants, greases, energy production and transportation. We innovate, develop and supply the broadest range of technologies for this market - including performance-enhancing polymers, viscosity index improvers, synthetic base fluids and advanced pour point depressants - and we continue to expand our portfolio of polymer solutions.

Fuels - Lubrizol's portfolio of fuel products is designed to meet the needs of consumers and the stringent performance demands of OEMs, fuel system manufacturers and fuel producers around the world. Our full range of gasoline, diesel and residual fuel additives promotes optimal power, fuel efficiency, engine and equipment life, as well as help to reduce emissions for transportation and industrial markets.

Industrial - Lubrizol offers one of the most complete lines of performance additives used to formulate lubricants for hydraulic, industrial gear, turbine, grease, metal processing and metal protection applications. Our portfolio includes Chemtool Incorporated, a custom grease manufacturer; and CPI Fluid Engineering, a supplier of synthetic and mineral oil-based fluids for refrigeration, food processing and industrial applications, including Paratherm™ heat transfer fluids.

About Lubrizol

The Lubrizol Corporation, a Berkshire Hathaway company, is a market-driven global company serving customers in more than 100 countries. We own and operate manufacturing facilities in 17 countries, as well as sales and technical offices around the world. Through our global sales and manufacturing networks, we are able to deliver the products and services our customers need, where and when they need them.
