

Lubrizon Additives partners with customers and OEMs to solve end users' toughest challenges through additives for engine oils, driveline applications, gasoline and diesel fuel, other transportation-related fluids and industrial lubricants.

To our business relationships, we bring trusted expertise, testing confidence, supply assurance and independent strength.

Our strategy – Vision 2020 – guides our perspective and decisions, and helps us engage with our customers more effectively. Specifically, we're focused on:

- **Growing industry value** – Through initiatives such as driving the adoption of higher-performing lubricants and engaging more deeply with OEMs, Lubrizon is working to encourage greater and faster innovation and adoption of lubricants.
- **Growing our market presence** – By leveraging our market knowledge and continuing to develop market-focused solutions, Lubrizon will fuel its growth, enabling us to continue delivering for our customers and their evolving needs.
- **Driving enterprise excellence** – Product integrity, supply reliability, talent development, efficiency and cost management all enhance our abilities to serve our customers, and are therefore of critical strategic importance to the company.

Segment President: Daniel L. Sheets

Our Business

Driveline - Lubrizol's broad additive product line covers a wide range of driveline applications, including passenger cars, commercial vehicles, and off-highway vehicles used in construction, mining, agriculture and forestry. We provide complete breadth and depth of knowledge, superior technical facilities, regional testing capabilities and talented people, all of which allow us to continue addressing evolving end-user demands through innovative performance packages for gear oils, transmission fluids and off-highway fluids.

Engine Oils - Lubrizol engine oil additives are designed to provide protection for end users driving both modern, high-tech engines and older models, enhancing vehicle performance while minimizing environmental impact. Our diverse product portfolio, which includes engine oil additives and performance polymers, ensures we are able to deliver the right oil for the right application, addressing consumer demands across a broad spectrum of routine and harsh environmental conditions.

Viscosity Modifiers - Lubrizol's viscosity modifiers are more than just thickeners - they are performance polymers that provide significant improvements for lubricants in a wide variety of applications, including

engine oils, driveline fluids, industrial lubricants, greases, energy production and transportation. We innovate, develop and supply the broadest range of technologies for this market - including performance-enhancing polymers, viscosity index improvers, synthetic base fluids and advanced pour point depressants - and we continue to expand our portfolio of polymer solutions.

Fuels - Lubrizol's portfolio of fuel products is designed to meet the needs of consumers and the stringent performance demands of OEMs, fuel system manufacturers and fuel producers around the world. Our full range of gasoline, diesel and residual fuel additives promote optimal power, fuel efficiency, engine and equipment life, as well as help to reduce emissions for transportation and industrial markets.

Industrial - Lubrizol offers one of the most complete lines of performance additives used to formulate lubricants for hydraulic, industrial gear, turbine, grease, metal processing and metal protection applications. Our portfolio includes Chemtool Incorporated, a custom grease manufacturer; and CPI Fluid Engineering, a supplier of synthetic and mineral oil-based fluids for refrigeration, food processing and industrial applications, including Paratherm™ heat transfer fluids.

About Lubrizol

The Lubrizol Corporation, a Berkshire Hathaway company, is a market-driven global company serving customers in more than 100 countries. We own and operate manufacturing facilities in 17 countries, as well as sales and technical offices around the world. Through our global sales and manufacturing networks, we are able to deliver the products and services our customers need, where and when they need them.
