OUR COMMITMENT TO SUSTAINABILITY

## About Our Ohio Facilities

The Lubrizol Ohio Facilities have been proudly manufacturing and researching highly specialized chemical products and services since 1928. Lubrizol has five facilities operating in Ohio – Wickliffe, Brecksville, Avon Lake, Bowling Green and Painesville. Our Wickliffe location is Lubrizol's world headquarters, in addition to the headquarters of our Lubrizol Additives segment.

## Economic Impact

- Payroll: Over \$250 Million
- Payroll Tax: Over \$8.5 Million
- Property Tax: Over \$4 Million

## Community Engagement

Improving lives in communities where our employees work and live has been a core value of Lubrizol since our founding in 1928. In the past decade, the Lubrizol Foundation has donated over \$27 million to Ohio Charities. We recognize the importance of creating a sustainable community by providing donations and resources to organizations like:

- United Way
- CollegeNow Mentor Program
- Greater Cleveland Foodbank
- The Lucy Idol Center
- American Red Cross
- Cuyahoga County Division of Children Services
- Wickliffe Family Resource Center

## Lubrizol Legislative Priorities

### **Low Carbon electricity is Important for Ohio Business Competitiveness**

For Ohio manufacturers which compete globally or supply to customers that compete globally, the ability to de-carbonize, or more specifically to migrate away from electricity generated by coal, oil or natural gas is becoming increasingly important. In their effort to combat climate change, the European Union and the UK are developing carbon taxes on imports. In addition to these pending taxes, large companies, which are customers of Ohio manufacturers, are requiring improvements in our energy mix in order to reduce the environmental impact of their supply chains so that they can meet the expectations of their governments and consumers. Many of Lubrizol's key European customers are in that group.

Access to low carbon energy is critical *if Ohio manufacturers are to remain competitive.* Our ask is that the State of Ohio support renewable energy and allow it to compete on an equal footing with oil, gas and coal.
